

Harnesses and Leashes

Inspired by *leading opinions* in the sector and the most expert international literature, we propose to substitute the collar, often a painful source of physical and psychic problems for the dog, with a **“non-inhibitive” type of harness**, which is simple to put on, comfortable for the dog and also smart.

A new harness line is now available, characterised by the high level of its design, above all focusing on the comfort of the dog, the **quality of the materials** and the **precision in production**. The line offers a good choice of colours, all of which can be coordinated with the leashes.

Wearability, that is: feeling an item of clothing is a perfect fit, means smartness and comfort which, together with the fact that it can be put on naturally and easily, ensures acceptability for the dog who will be happy to wear something comfortable that neither irritates nor is painful in any situation, plus is smart.

Characteristics

The quality of the materials, which are all produced in Europe, incorporates the non-toxic, anallergic and recyclable requirements with its resistance and wear, enabling us to put a 5-year guarantee on the product.

Extreme attention is paid to the quality of detail in **handicraft manufacturing**, which takes place on our premises by technically qualified personnel.

Design, dimensions appropriately proportioned and position of the harness on the dog have all been studied in depth to guarantee maximum comfort in all situations. Even when pulling or jerking, or being restrained, pressure is on the dog's thorax only.

The harness causes neither pain, sense of restriction, nor friction or strain on the skin, and does not limit movement or create other discomfort. The two buckles and their positions facilitate both fixing and removing of the harness with no fuss for either dog or owner.

Webbing

The webbing is made of high tenacity, spun-dyed nylon-6 which guarantees colour homogeneity and resistance. The special characteristics of nylon (polyamide) make it particularly suitable for harness and leash production. In fact, amongst synthetic fibres, nylon stands out for its softness, optimal strength-to-weight ratio, abrasion resistance, and chemical and biological stability. Finally, it is fully recyclable. The webbing is made in Italy to our design.

Manufacture

The harnesses are **individually produced** paying great attention to detail. Both safety and comfort are of essence, and all parts are sewn together with **secure stitching**. The overlapping parts, which have contact with the skin, are machined with a **special finish** that avoids any rubbing irritations, particularly in the short-haired dog.

The Plastic Components

The buckles and adjusters are made of acetal resin which has excellent mechanical and shock resistance even in extreme conditions. In order to ensure the dog's comfort, the **shapes are rounded off** and have no sharp edges.

Sizes and Adjustability

Careful study of the harness sizes, adjustable in five places, ensures **optimal wearability and adaptability** of the harness design for all dog sizes and morphology.

The Metal Components

The metal components are in Inox 304 stainless steel which **does not release Nickel or provoke allergic reactions**, in accordance with the European regulations for humans.

Leashes

The webbing is 15 mm wide and is available in two lengths: 2 or 3 metres, in the same colours as the harnesses. They have a small snap-clip on the loop handle for the purpose of halving the length of the leash.

They are light and portable; their length gives the dog the freedom to move around even in places where use of the leash is compulsory. They may not be suitable for exuberant dogs, that jerk the leash.

Guarantee

All products carry a manufacturer's guarantee, in accordance with the regulations in force.

Guarantee extension

With the guarantee extension, the harnesses are covered for 5 years from purchase date against all faults, breakage or that which is not considered normal wear and tear, on the condition that the harness is verified to have been used in a correct manner. That which is considered not to be correct usage is, for example, chewing of the article or failing to follow washing instructions.

Repairs not under Guarantee

In addition to the aforementioned extension of guarantee, Haqihana provides a repair service on the understanding that such repairs are technically possible in relation to the type of problem.

Harness sizes

Code (col = colour)	Size	Webbing mm	Girth Ø cm		Breed
			min	max	
HRS_XL_col	XL	25	90	130	St. Bernard, Great Dane, Leonberger, Newfoundland
HRS_L_col	L	25	70	100	Weimaraner, Rottweiler, Dobermann, German Shepherd
HRS_M_col	M	25	60	80	Golden Retriever, Setter, Boxer, Labrador
HRS_S_col	S	20	50	70	Cocker Spaniel, Beagle, Fox terrier
HRS_XS_col	XS	15	40	55	West Highland, Pug Cavalier King Charles
HRS_XXS_col	XXS	15	33	45	Miniature Pinscher, Chihuahua, Yorkshire Terrier

Leash sizes

Code (col = colour)	Webbing mm	Length m
L2M_col	15	2
L3M_col	15	3
L3M_20_col	20	3

Colour codes

On request:

- multicolor harnesses
- special size harnesses
- 5 or 8 meter long leashes
